COORDINATING COMMITTEE

COCOM DOC . 3774
November 17th, 1959MEMORANDUM OF THE GERMAN DELEGATION
EXPORT TO POLAND OF PANORAMIC RADIO RECEIVERS

4403006

The German authorities have received a request for the export of 4 panoramic radio receivers P 55 and P 55 S with accessories to Poland. Total value \$ 4.468.--.

The equipments covered by item 1516 have the following characteristics: Frequency range: TV- channels 2 - 11.

Testing bandwidth: a) 7 Mc/s
b) 1 Mc/s
c) 0

Testing frequency - about 70 c/s
Sensibility - about 5 k T o.

They have been especially designed for the supervision of TV-channels. They are used to supervise disturbing effects by radiations of VLF broadcasting receivers on TV receivers. The channels, the bandwidths and the distances of frequencies prove without any doubt that the equipment can be used for the intended purposes only, since other specifications are needed for military purposes.

Assurances have been received against diversion and reexport.

The German authorities would like to grant the licence. - The German Delegation submit the case under the special procedure adopted towards Poland. They would like to receive the views of the Committee at an early opportunity.
